VECTOR METHOD

Orient the day. Remove friction. Close the loop.

01 ORIENT

Identify the day's direction.

↓

02 SELECT

Choose only what can move the needle.

↓

03 REDUCE FRICTION

Remove the obvious failure point before it wins.

↓

04 EXECUTE

Train, work, connect, recover.

↓

05 CALIBRATE

Close the loop.

OPERATING STANDARD

Direction before tasks.

Friction before discipline.

Calibration before judgment.
